# Website Description

Website title: Young Bros Pressure Washing

Product description: My friend recently started a pressure washing company that specializes in revitalizing outdoor surfaces, restoring them to their original condition. The company offers a wide range of services, including cleaning driveways, sidewalks, patios, decks, and even the exterior walls of homes. They use high-powered pressure washing equipment combined with eco-friendly cleaning solutions to effectively remove dirt, grime, mold, and mildew, ensuring a thorough clean without harming the environment. The company prides itself on delivering exceptional results with attention to detail, aiming to enhance the curb appeal of every property they service.

# Home Page

This is the main landing page where the users get an introduction to the pressure washing company. It will include a brief overview of the services offered, a button to schedule a service, and customer previous customer testimonials.

# Services Page

A detailed page that outlines all the pressure washing services offered by the company. Each service will have a description, benefits, and possibly before-and-after images. This page will also include pricing information or a link to request a quote.

# About Us Page

A page dedicated to telling the story of the company, its values, and the team behind the operations. This will help to build trust with new potential customers. This page will also contain personal bio's of all of the employees and any certifications, awards, or affiliations.

# Gallery/Portfolio Page

A visual showcase of the companies past work. This page would feature high-quality before-and-after images of completed projects to demonstrate the effectiveness of the companies services. These image galleries will be organized by service type (Driveways, Decks, Home Exteriors) and will have descriptions accompanying each set of images, explaining what was done.

# Contact Us Page

A straightforward page where potential customers can reach out to schedule services, ask questions, or request a quote. This will include a contact form for inquiries and service requests along with the company's phone number, email address, and physical address. Additionally, the companies links to social media profiles will also be included.

# Data usage

Customer data- such as the name, contact information and service history that only administrators and authorized users can view and edit

Service data- Each service will have a unique ID, service name, price, and tool list associated with it that only administrators and authorized users can view and edit.

Customers can view their scheduled appointments and request changes.
